Fuel type	WOOD-BURNING OVEN
Type	Static

WOOD-BURNING OVENS FOR PIZZAS
(Series D)

The ovens of series D are of domical type and are assigned for baking of pizzas. They are made of vibrated refractional material with high percent of two-aluminum-three-oxide (Al₂O₃), which guarantees high wearing out resistance and sturdiness. The domical form of the baking chamber guarantees an even baking at low wood consumption. Insulation materials with low coefficient of heat conductivity have been used. The considerable thickness of insulation helps to achieve maximum economy. All elements of the oven are placed in a case which allows its mobility.
